ACHIEVING RESULTS FOR OUR CLIENTS

Advantix helps luxury resort deploy pool leak detection and temperature monitoring solutions that save millions

Client Profile

Industry: Hospitality

Location: Beverly Hills, CA

Mobile Devices: Predictive maintenance

Situation

Rooftop pool leaked unnoticed for months

The problem caused millions in damage

Reputation for providing a high-end experience suffered

Management sought solution to prevent future problems and damages

Solution

Advantix installed wireless LoRaWAN sensors and gateways to automatically monitor the pool for water leaks. Sensor data transmits in real-time to an easy-to-use web and mobile application, enabling staff to effortlessly monitor the pool remotely. Hotel stakeholders were so impressed that they expanded the solution to include refrigeration temperature monitoring to preserve the quality and freshness of perishable food.

Results

● Staff can detect and repair pool leaks before they become costly problems

● Staff can identify and resolve F&B refrigeration issues to protect perishable goods

● 30% reduction in maintenance staffing

● 90% reduction in potential repair costs
